DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16 and 24, drawn to a conductive composition and article made therefrom, comprising:

An organic polymer

A nanosized conductive filler and/or carbon fiber

Graphite,

classified in class 524, subclass 89+.
 - II. Claims 17-23 and 25, drawn to a method for manufacturing a composition, classified in class 523, subclass 223.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process, such as by a process that results in an electrical resistivity greater than $10e^8$ ohm-cm.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1714

4. Claims 1-6 and 11 are generic to a plurality of disclosed patentably distinct species comprising:

A thermoplastic resin as set forth in claim 3

A thermoset resin as set forth in claim 4

A blend of thermoset and thermoplastic polymer as set forth in claim 5

A particular physical form of graphite as set forth in claim 6

A particular physical form of nanosized conductive filler as set forth in claim 10

A particular species of nanosized conductive filler as set forth in claim 11

5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

6. Applicant should clearly indicate one selection from each of the following components that is intended for the elected species.:

The particular component of polymer

The particular component of filler and/or carbon fiber

The particular physical form of graphite

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1714

7. A telephone call was not made to to request an oral election to the above restriction requirement, due to the complexity of the art invoved.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kriellion A. Sanders whose telephone number is 571-272-1122. The examiner can normally be reached on Monday through Thursday 6:30-7:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan can be reached on 571-272-1119. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
